

# STUDENTS AND TEACHERS: CAST YOUR VOTE TO HELP CHOOSE DELAWARE'S STATE DRAGONFLY!

*Voting opens  
April 15th! Visit  
the Delaware  
Naturally website  
linked below to  
learn more about  
these six beautiful  
species of  
dragonflies and  
vote for your  
favorite! The  
winner will be  
announced on  
Friday May 9th!*

**Common Green Darner**  
The Common Green Darner is quite large and conspicuous. It eats small flying insects and spends most of the day flying back and forth over water.

**Dragonhunter**  
The Dragonhunter is the largest dragonfly in Delaware. It feeds on large insects, such as butterflies, and lives on large rivers.

**Tiger Spiketail**  
The Tiger Spiketail is an extreme habitat specialist. It is only found in tiny streams and is one of Delaware's rarest, most localized dragonfly.

**Calico Pennant**  
The Calico Pennant is one of Delaware's most beautiful small dragonfly. It is usually found perched low to the ground waiting for prey to fly by.

**Blue-Faced Meadowhawk**  
The Blue-Faced Meadowhawk is considered one of Delaware's most beautiful dragonfly. It lives in vernal pools deep in the forest.

**Blue Dasher**  
The Blue Dasher is one of the most common and widespread dragonfly in North America. It is found at almost every body of water.
